

Problem

Given a string containing lowercase English letters, find and print all the characters that occur more than once.

You must use bit manipulation to track the characters that have already appeared.

Input Format

The first line contains a string S

Constraints

$1 \leq |S| \leq 10^5$ S contains only lowercase English letters (a-z)

Output Format

Print all duplicate characters in the order of their first repeated occurrence. If there are no duplicates, print No duplicates.

Python 3

```
4 3
10 def main():
11     seen = set()
12     duplicates = set()
13     out = []
14     for c in s:
15         if c in seen:
16             if c not in duplicates:
17                 duplicates.add(c)
18                 out.append(c)
19         else:
20             seen.add(c)
21
22     if not out:
23         print("No duplicates")
24     else:
25         print(" ".join(out))
26
27 f __name__ == '__main__':
28     main()
29
```
