

Problem

The wildcard characters have the following meanings: * can match zero or more characters. ? can match exactly one character. Any other character in the pattern must match the corresponding character in the input string exactly. Print 1 if the input string matches the pattern; otherwise, print 0.

Input Format

The input consists of two lines:

Submissions

The first line contains the input string. The second line contains the pattern string.

Constraints

$1 \leq \text{length of string} \leq 10^5$ $1 \leq \text{length of pattern} \leq 10^5$ The string contains English letters and digits. The pattern contains English letters, digits, *, and ?.

Leaderboard

Output Format

Print:

1 if the input string matches the pattern. 0 if the input string does not match the pattern.

Sample Input 0

```
abcbcccdcd
abcbcccdcd?c*d
```
