

Problem

their weights.

Constraints $2 \leq N \leq 30$ $1 \leq \text{arr}[i] \leq 1000$

Submissions

Output Format

Print a single integer representing the minimum possible difference between the total weights of the two groups.

Sample Input 0

4
3 4 5 6

Language

Python 3

```
5 total = sum(arr)
6 ans = float('inf')
7
8 def solve(i, count, current):
9     global ans
10
11     if count > n // 2 + n % 2:
12         return
13
14     if i == n:
15         if count == n // 2 or count == (n + 1) // 2:
16             ans = min(ans, abs(total - 2 * current))
17         return
18
19     solve(i + 1, count + 1, current + arr[i])
20
21     solve(i + 1, count, current)
22
23 solve(0, 0, 0)
24
25 print(ans)
```
