

Problem

A subsequence is a sequence that can be derived from another string by deleting some or no characters without changing the order of the remaining characters.

Print:

YES if "hackerrank" is a subsequence of s. NO otherwise.

Submissions

Input Format

The first line contains an integer q, the number of test cases.

Each of the next q lines contains a string s.

Constraints

$1 \leq q \leq 100$ $1 \leq |s| \leq 10^5$

The sum of the lengths of all strings does not exceed 10^6 .

Leaderboard

Output Format

For each test case, print:

YES

or

NO

Hidden Test Case

Use print or log statements to debug why your hidden test cases are failing.

Hidden test cases are used to evaluate if your code can handle different scenarios, including corner cases.
