

Problem

You are given two integers A and B. Your task is to calculate their sum without using the + or - operators.

Use only bitwise operators to compute the result.

Input Format

A B

Constraints

$-10^9 \leq A, B \leq 10^9$

Output Format

Print a single integer representing the sum.

Language

Python 3

```
1 # Enter your code here. Read input from STDIN. P
2 a,b=map(int, input().split())
3 while b!=0:
4     c=(a&b)<<1
5     a=a^b
6     b=c
7 print(a)
8
```

Line: 8 Col: 1
